Comments:

As the Titans group we have decided to make an online shopping which we named FIT PERFECT.

The project is a web-based shopping system for an existing shop. The project objective is to deliver the online shopping application into android platform.

People in large number are doing online shopping today, and it is not only because it is convenient as one can shop from home, but also because there are ample amount of varieties available, with a high competition of prices, and also it is easy to navigate for searching regarding any particular item.

Online shopping is the process where by consumers directly buy goods or services from a seller in real-time, without and intermediary service, over the internet. It is a form of electronic commerce. This project is an attempt to provide the advantages of online shopping to customers of areal shop. It helps buying the products in the shop anywhere through internet by using an android device. The client can then get the online shopping and home delivery service from his favorite store. Because the application is available on the smartphone, it is easily accessible and always available.
